

## Custom Combat Tactical Medicine Course for Law Enforcement

This course provides custom training to meet the client's needs in the basic proficiencies necessary to support law enforcement tactical teams. These proficiencies include the skills necessary to operate and perform a basic medical assessment, to minimize mortality and to maintain safe operational capabilities in a dynamic, fast moving tactical operation. Our instructors are senior tactical medical trainers, who are certified by the National Association of Emergency Medical Technicians (NAEMT) and other nationally recognized medical organizations. Many of the topics will be aligned with the accredited requirements of the Continuing Education Coordinating Board of Emergency Medical Services (CECBEMS). This course is available both CONUS and OCONUS

Tactical Medicine Training Kit
